

TROLLEY SQUARE

PARK

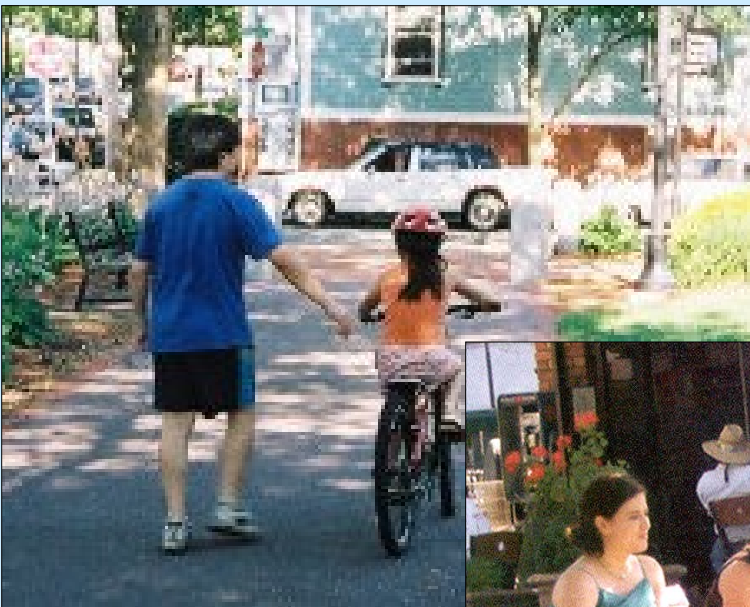

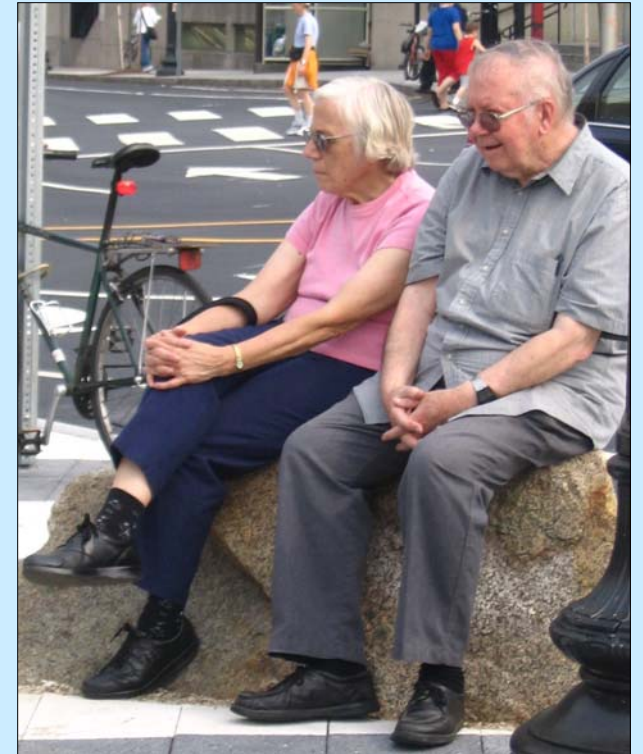

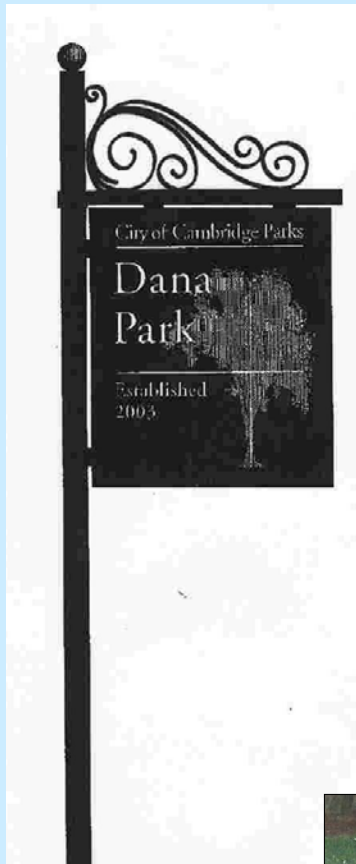

Trolley Square Public Open Space

2006

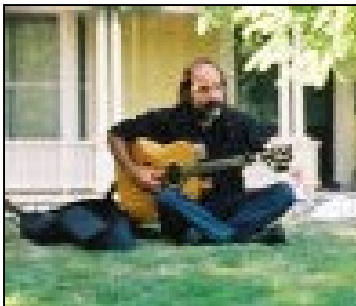

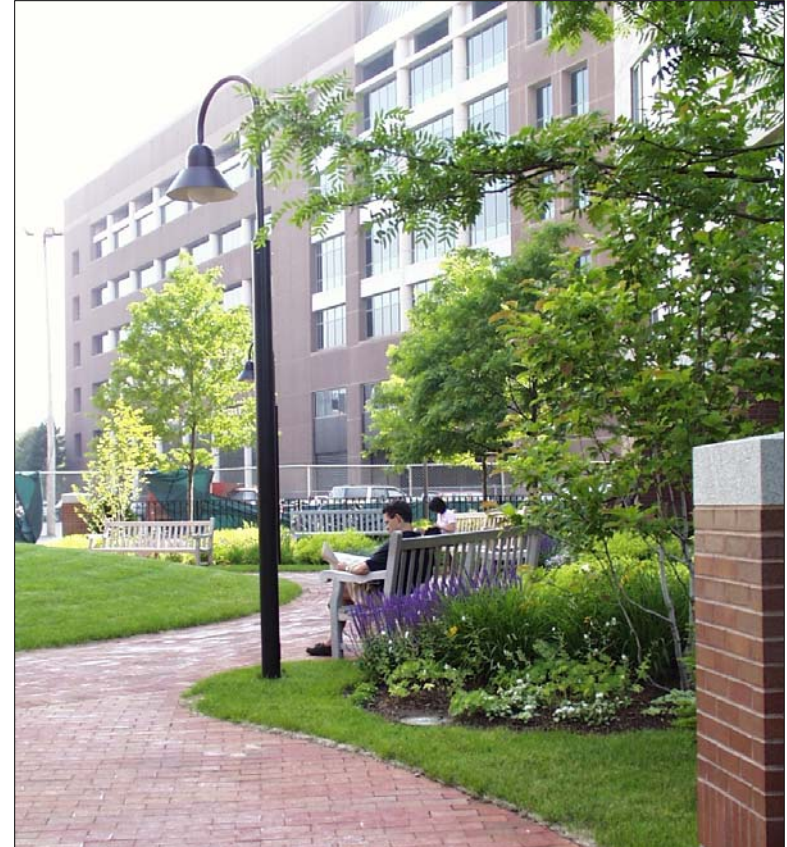

Trolley Square park will provide both recreation for people and give us an everyday connection to nature

The new park should feel open and welcoming; accessible to everyone, a public space

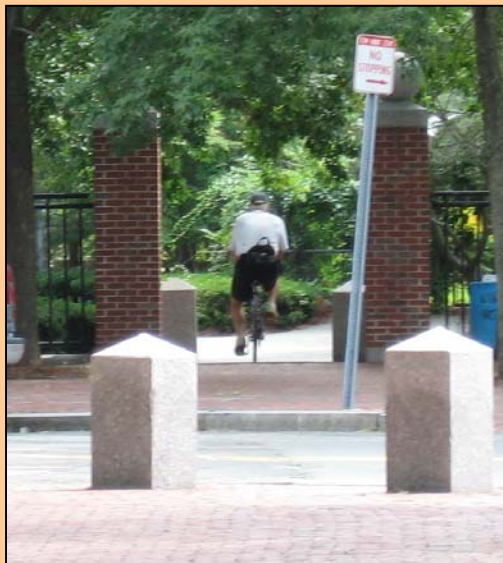

The new park should be an urban oasis, providing a pleasant view, a sense of solitude, reducing stress, making city life more sustainable

Trolley Square park will connect with other public and private open spaces to feel more spacious

The existing park (Linear) has its own visual character of building materials and presently supports various recreational activities that are respected and enhanced by the proposed design

The new park will introduce naturalizing materials and plantings to provide benefits for air and water quality, to support small wildlife, and to moderate air temperature by offering shade

Sitting rocks

Shade trees

Plants that attract wildlife

Colorful perennials

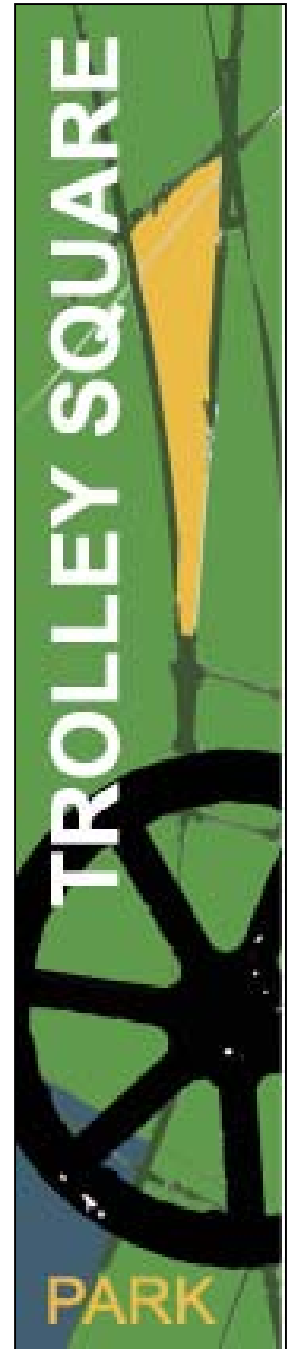

The new park should be dynamic, interesting, stimulating, and beautiful

"Bannister" warm up station/play equipment

Historic trolley wheels
(to be restored)

Park banner

An inviting curving, open and airy fence design that is functional, unique and beautiful

Curving plaza fence

The new park will use park furniture and materials with a proven track record of success in public spaces

Accessible water fountain

Park furniture with wood seats

Trash receptacle

Kiosk/community bulletin board

Park light
